AURIVO — RISK DISCLOSURE

Last updated: 24 July 2026

Read this before using Aurivo. It forms part of the Aurivo Terms of Service.

---

1. YOU CAN LOSE MONEY — INCLUDING MORE THAN YOU DEPOSIT

Trading foreign exchange, CFDs, metals, indices and other leveraged products carries a **high level of risk**. Leverage magnifies losses as much as gains. A small adverse price move can wipe out your position, and in some conditions your losses can exceed your account balance.

The majority of retail traders lose money. Only trade with money you can afford to lose entirely.

2. AURIVO DOES NOT GIVE ADVICE

Aurivo is a control panel. **You place every trade.** Aurivo never suggests, recommends, signals or selects a trade, an instrument, a direction, an entry, an exit or a position size. It executes the instruction you give it.

Nothing in the panel — charts, statistics, zones, ladders, the economic calendar, position data, or any other display — is a recommendation or a prediction. These are tools that present information. Interpreting them is entirely your responsibility.

3. NO GUARANTEE OF PERFORMANCE

We make no claim, promise or guarantee about profitability. **Past performance is not indicative of future results.** Any number, chart or screenshot you see from us demonstrates how the software works — never what you should expect to earn.

4. TECHNOLOGY CAN FAIL

Aurivo depends on a chain of systems, any of which can fail:

your device → internet → cloud machine → MetaTrader 5 → your broker's servers

Failures, outages, latency, disconnections, delayed orders, partial fills and rejected orders **will happen at some point**. Fast markets and news events make this more likely, exactly when it matters most.

Protect yourself:

- Keep independent access to your broker account (their own platform or mobile app) so you can always close or manage positions without Aurivo.
- Never rely solely on Aurivo to manage open risk.
- Consider broker-side stop losses, which sit at the broker and survive any failure of

your device, your connection or Aurivo itself.

- Verify every order after placing it. Confirm it appears in your broker's own platform.

5. AUTOMATED FEATURES STILL NEED YOU

Features such as trailing stops, break-even moves, ladders and pending orders run on your cloud machine and depend on it, on MT5, and on your broker's connection. If any link breaks, an automated action may not execute. Do not treat these features as guaranteed protection.

6. YOUR BROKER IS YOUR COUNTERPARTY

Your funds, your account and your execution are entirely with your own broker. We hold no client money and have no control over your broker.

Your broker determines execution quality, spreads, slippage, swaps, margin rules and leverage. Your broker may also restrict or prohibit third-party software, automated tools or Expert Advisors — **check your broker's terms before using Aurivo.** We are not responsible for any action a broker takes against your account.

7. YOUR JURISDICTION MATTERS

Rules on leveraged trading vary widely by country, and some products are restricted or prohibited for retail traders in certain jurisdictions. **You are responsible for ensuring your trading is lawful where you live**, and for the tax consequences of your trading.

8. TRADING PSYCHOLOGY

Aurivo is built for speed. Fast execution makes it easy to trade more often and larger than you intended. Overtrading, revenge trading and position sizing driven by emotion are among the most common causes of retail losses. Set your own rules before you sit down, and size positions deliberately.

If trading is affecting your wellbeing, finances or relationships, stop and seek support.

In Australia, the National Gambling Helpline (1800 858 858) and Lifeline (13 11 14) are free and confidential.

ACKNOWLEDGEMENT

By using Aurivo you confirm that you have read and understood this disclosure, that you accept full responsibility for every trade you place, and that you understand Aurivo provides software only — not financial advice.
